

Decorative Finish Care Card

Your firearm has been coated with a decorative surface finish. This decorative finish will withstand the rigors of normal use, however, it is susceptible to holster wear and other abrasive surfaces as well as exposure to certain chemicals & cleaners. Care should be exercised during use and cleaning to ensure the longevity of the decorative finish.

Care & Cleaning: Wipe the exterior surface (decorative finish) with clean water. Use normal gun oil lubricants on the internal portion of the firearm. Do not expose the decorative finish to solvents, paint thinners, or other abrasive cleaners. Do not store the firearm with lubricants on the decorative finish surface – The finish may soften through extended contact with certain lubricants, causing premature wear of the coating.

Limited Warranty – SIG SAUER warrants the decorative finish to be free from defects in application & appearance for a period of 1 year. SIG SAUER will, at our option, refinish or replace the affected component with a like or similar component at no charge, excluding shipping, during the warranty period. Not covered are surface wear or fading through normal use; damage due to contact with abrasive surfaces; exposure to solvents, paint thinners or other abrasive cleaners; or finish damage due to intentional misuse or abuse.
