ABOUT OUR COURSES

PISTOL/RIFLE/SHOTGUN/PRECISION SCOPED RIFLE

The SIG SAUER Academy has programs that are designed to achieve results across a broad range of platforms, from pistols and rifles, to shotguns and precision long-range shooting. All courses are taught from a foundational level and have a progression structure allowing students to develop their skills at their own pace. Depending on your personal training objectives, we offer classes for personal and home defense, individual skill building, and instructor certification.

ADVANCED TRAINING

Advanced training courses are designed to take a student's skills to an extremely high level. These classes help provide students the knowledge, skills, and confidence to improve their performance and decision-making in a high-risk, high-stress environment. These courses include specific subjects such as low light pistol and rifle, advanced medical training, executive protection, as well as vehicle and scenario-based training.

ARMORER

SIG SAUER is one of the many major manufacturers that offers civilian armorers courses. Our armorer's certification gives students a complete and thorough understanding of SIG SAUER firearms, proper maintenance techniques, and inspection processes. These courses are designed to provide all of the necessary information to preserve the firearms factory warranty. Students who successfully complete these courses receive a three year armorer certification.
