OPERATION

- Installing the battery – The battery is mounted in the lower right side at the objective or front-end of sight. The battery cap [I] is removed by rotating the cap in the counter-clockwise (CCW) direction. Remove the cap and insert a fresh AAA battery positive (+) end first. The negative (-) should be facing outward. Replace the battery cap by rotating the cap clockwise (CW) until finger tight.
- The illumination control [G] is located at the ocular or rear of the sight, opposite of the battery cap. Turn the rotary dial clockwise (CW) to increase the brightness or counter-clockwise (CCW) to decrease or turn off the sight.
- The sight also features MOTAC™. It will automatically turn off after 120 seconds of inactivity. As soon as the sight senses motion it will automatically power back on to the current setting.
- The sight has 11 illumination settings: 9 daytime and 2 NV.

MOUNTING THE SIGHT

- The ROME07S is designed for use on most types of firearms with MIL-STD 1913 Picatinny Rail. Because the ROME07S has infinite eye relief, the sight can be mounted anywhere on the rail; forward or back.
- ROME07S comes configured for 1.63" Lower 1/3rd Co-Witness sight height. To install the sight on a firearm, set the mount on the Picatinny Rail at your preferred eye relief, push the sight forward into the rail lugs and torque the half-inch nut [F] to 65 in-lbs.
- Shorter screws for 1.41" Absolute Co-Witness are included in the box. If the shorter sight height is preferred, remove the mounting screws [C] and spacer [E] using the provided mount tool. Install the (4) shorter mounting screws and torque: 18-20 in-lbs.

SIGHT ADJUSTMENTS

- Elevation adjustments - Using a coin or shell casing, turn the Elevation Adjustment [D] counter-clockwise (CCW) to move Point of Impact (POI) UP. To move POI DOWN, rotate clockwise (CW). Each click moves POI 0.5 MOA.
- Using a coin or shell casing, turn the Windage Adjustment [H] counter-clockwise (CCW) to move POI RIGHT. To move POI LEFT, rotate clockwise (CW). Each click moves POI 0.5 MOA.

MAINTENANCE

- Cleaning - Keep your lenses clear by using a soft cloth (provided) or lens pen.
- Always use the provided flip-back lens covers [A & B] to ensure sight remains scratch free.

TROUBLE SHOOTING

- POI changes between groups
 - Ensure half-inch nut [F] and the (4) mounting screws [C] torqued to the values located in the Mounting Section above.
 - Check/Clean your firearm.
 - Check for variations in ammunition.
