Turning Sight On and Off / Illumination Control

• On/Off buttons and illumination control is located on the top of the sight. Press and hold either the (+) or (-) button for more than 1 second to turn the sight on.
• To turn the sight off press and hold either the (+) or (-) button for more than 1 second

SIGHT ADJUSTMENTS

• Windage and elevation adjustments are located on the rear top and rear right side of the sight. They each come with caps that when removed can be used to make adjustments to the point of aim of your sight.
• Elevation adjustments - the elevation adjustment is on the top of your sight. To raise your point of impact turn the adjustment CCW with the cap or a coin. Each click is equal to 0.5 MOA. To shift the point of impact to the left turn the adjustment clockwise (CW).
• Windage adjustments - the windage adjustment is on the right side of your sight. To shift your point of impact to the right turn the adjustment CCW with the cap or a coin. Each click is equal to 0.5 MOA. To shift the point of impact to the left turn the adjustment clockwise (CW).

MAINTENANCE

• Cleaning - Keep your lenses clear by using a soft cloth or lens pen. The best way to maintain the quality of your lenses is to keep them clean and free of dust that can cause scratches.
• Always use your sight cover to ensure that the sight optics remain scratch free.

TROUBLESHOOTING

POS changes between groups

• Check that the mount is affixed tightly to the rail
• Check/Clean your firearm
• Check that the mount is affixed tightly to the rail

POI changes between groups

• Check the current setting.
